KNOW THE DIFFERENT TYPES OF TOW TRUCKS AVAILABLE

A tow truck helps you rescue your vehicle in the event of some unwanted circumstances. The car towing service in Coventry will tell you about the different options available to tow your car! Here are 5 different types of tow trucks that you need to know about. An integrated tow truck combines two separate components into a single machine; the most typical combination is a boom and a wheel lift. These are helpful for jobs that don't require a complete boom truck, and integrated trucks feature controls inside the vehicle, making it easy to pick up a car fast without getting out of the truck. Because the arms are so deeply anchored into the truck's body, these pickups may be either medium- or heavy-duty in size without sacrificing stability or power. So, the next time you are stranded with your vehicle, you know which tow truck to choose! For more details call the best car towing service in Coventry and discuss your requirements!
